Production Statement:

Bridging Green Solar Energy GAPS in Somalia.

Head Office:

Mogadishu, Somalia.

Business Partners:

Local Solar Energy Companies; Somali Government Authorities and Multi-National Companies from Foreign Countries.

ABOUT US

Ibrasom Green Solar Energy is a vibrant and fast growing SOLAR energy developer and installation Company. The company was established in 1st January 2017 to provide Green Solar Energy SOLUTIONS in Somalia. It began with few staff and one client. Up to date; this company is among the best companies in solar energy development and installation. The management is under General Director and Operations Manager who runs business affairs in conjunction with staff in branches in Somalia. Moreover; for professional standards; the management works with a solar energy developer and s installation specialist.

Moreover; the management structure of the company addresses ENERGY needs for individual clients and government institutions. At present; the company is proud of its vast growing clientele of over 200 clients and 50 employees. Additionally, the firm endeavour to improve living standards of people in the rural and urban areas by providing low cost solar energy. Moreover; to meet the desired and honorable life of low income earners, it supplies and installs high quality solar energy. Our services are in three-fold such that technicians develop solar systems suitable for energy production. The most significant part of our services entails solar installation and distribution of electricity generated from sun power.

We have an established track record of providing solar energy to domestic and commercial users. Further; we design solar systems that are effective and affordable. Moreover; for professional solar energy standards; the management works together with a team of TECHNICIANS in the area of solar energy development and system installation. On another front; this company has kept a very high standard in solar energy prodution and distribution to clients in households and industrial area. Additionally; our company brings under one roof a range of professional services that help meet power supply demand in Somalia. Our team of technicians provides personalized high quality solar energy that meets international standards.

OUR PROMISE

To provide solar energy SOLUTIONS and guidance to clients.

VISION

To provide the desired client's satisfaction by keeping value driven Green Solar Energy services to our domestic and industrial based clients in the market.

OUR MISSION

At IBRASOM GREEN SOLAR ENERGY, our goal is to provide the highest level of SOLAR ENERGY service and at an affordable price.

OUR APPROACH

We provide SOLAR ENERGY to clients step by step with a view of eliminating the Green House Gas impacts of non-renewable energy. Moreover; we use SOLAR POWER to generate electricity from the sun with a move to clean energy production.

OUR CORE VALUES

We are SOLAR ENERGY DEVELOPERS and INSTALLATION company under the guidance of the following values:-

1. Excellence
2. Responsiveness
3. Customer Satisfaction
4. Integrity
5. Moral Ethics
6. Partnership
7. Professionalism

PROBLEM AND SOLUTION

We develop SOLAR ENERGY SYSTEMS and INSTALL them to clients in rural and urban areas. The company management understands that clients have different interests when it comes to solar energy use. Therefore; our company meets all demands in line with international standards. Furthermore; clients are always satisfied with our SOLAR energy installation. We understand the dynamics of solar energy development and system installation in relation to demands of clients. Therefore; we endeavour to provide them with the best solar power installation that makes them happy. Indeed, we provide that SOLUTION to clients in need of energy. For that reason; our business provides solution in solar energy development and installation.

Market Size and Segment >

Our market target is in TWO categories in rural and urban areas with an estimate of 5 million clients. First and foremost, we SELL and INSTALL SOLAR EQUIPMENT for electricity need in the households, business premises and government institutions. Secondly; we develop SOLAR SYSTEMS to meet specialized industrial demands for clients.

Our Practical Areas Of Service >

We offer a wide range of GREEN SOLAR ENERGY services that include the following:-

Solar Energy System

Ibrasom Green Solar Energy provides POWER which is usable energy generated from the sun in the form of electric energy. Solar energy is captured in different ways based on photovoltaic solar panel system that converts the sun's rays into usable electricity. We develop solar energy systems to help supply electricity through:-

a. Grid -Tied Systems

We develop solar for domestic use which is connected to the grid to use electricity when panels are not generating power in home.

b. Hybrid Systems

We develop Solar Plus Systems and solar panels which are paired with solar battery to store energy for home use.

c. Off-Grid Systems

We provide electricity to homes without connection to the grid while the home runs off the energy generated and stored on-site.

Our Practical Areas Of Service >

Solar System Installation

Ibrasom Green Solar Energy specialize in domestic and commercial solar solutions by heating water , irrigation, security systems, power back up and surveillance systems. Solar panel installation guide involve step by step process.

Step.1 Mount installation

Step 2: Install the solar panels

Step 3.Do electrical wiring

Step 4.Connect the system to the solar inverter.

Step.5.Connect solar inverter and solar battery

Step 6.Connec solar inverter to the grid

Step 7.Start solar inverter

Solar Energy Distribution

Ibrasom Green Solar Energy services aim at distributing solar electricity to the households and industrial premises by using roof-top systems .We do not deal with centralized generation where solar electricity is produced by a large plant and then distributed to clients through a power network. We endeavor to distribute solar PRODUCTS and POWER in the set-up systems and be part of client's success.

Our Practical Areas Of Service >

Solar Power Back-Up

Ibrasom Green Solar Energy experts provide a long-term investment that makes clients benefit when there is power black-out. We use a series of container batteries designed to restore power immediately there is black-out. We therefore provide 24/7 power back-up solution and supply of power to clients in business. Solar power back up system are always ready with all necessary support to interruptions from the inverter, solar battery charging system and grid power transfer to the client solar system.

Solar Equipment Supply

Ibrasom Green Solar Energy supply a wide range of solar energy products such as MPPT solar charge controller, solar charge controller, pure sine wave inverter, industrial solar modules for remote applications in MAPPS class 1 Div 2PV systems. Other solar energy equipment consist normal components for solar energy system such as solar panels, inverters, central inverters, micro inverters, racking systems, ground mounts and ballasted roof mounts.

Location of Office

Our company offices are located in Mogadishu, the Capital City of Somalia. We have enough knowledge and experience in SOLAR ENERGY DEVELOPMENT and INSTALLATION that meet the demand of our clients. The offices open from 8.00 a.m to 9.00 p.m in a week.

Solar Energy Equipment

Our offices are fully furnished with relevant equipment. The facilities are checked and tested in readiness for daily work. We use friendly technology that incorporates several computers which employees use. There is continuous monitoring and evaluation of technology use. The establishment of our company has come at a time when SOLAR ENERGY development and installation is in demand. Moreover; we have also increased the number of staff and branches within Mogadishu to meet solar energy production.

Key Metrics

The management monitors growth in terms of clients and income per month. In every quarter of a year; there are set targets to measure business progress.

SOLAR ENERGY CLIENT!

1. Your Expectations

We listen to our customers and seek to satisfy their SOLAR ENERGY and POWER SYSTEM INSTALLATION. Our joy is the happiness of the client. We have the client at heart. Additionally; we go beyond the cost of system installation to make a mark in the domestic and industrial sector.

2. Value for your Money

IBRASOM GREEN SOLAR ENERGY is committed to SOLAR ENERGY DEVELOPMENT and INSTALLATION that add value to the clients. We offer development and system installation that match the VALUE of money.

Why Choose Ibrasom Green Solar Energy?

“

IBRASOM GREEN SOLAR ENERGY LIMITED is an icon in SOLAR ENERGY DEVELOPMENT and INSTALLATION. We have a history in solar energy business. Indeed; you will want to choose us for SOLAR ENERGY DEVELOPMENT and INSTALLATION because of the following reasons:-

1. We have trained TECHNICIANS who serve with dedication to client's demand.
2. Our SOLAR ENERGY services are supervised to the expectation of client's satisfaction.
3. We have invested in SOLAR ENERGY equipment to deliver adequate services.

Health and Safety Policy >

This policy is always read in conjunction with SOLAR PRODUCTION and safety policies that set out specific responsibilities and arrangements by which health and safety is to be organized, implemented and monitored within the company.

IBRASOM GREEN SOLAR ENERGY is providing a healthy working environment for all staff and non-employees at risk. We use all reasonable efforts to ensure safe environment throughout SOLAR ENERGY development and POWER installation.

1. IBRASOM GREEN SOLAR ENERGY considers that health and safety is part of all our solar energy work and co-operation between technicians and the client is important to achieve required standard of SOLAR energy production.
2. IBRASOM GREEN SOLAR ENERGY and its management uphold the policy of responsibility of technicians to promote standards of health and safety of workers.
3. IBRASOM GREEN SOLAR ENERGY and its management :-
 - a. Maintain a safe and healthy workplace, so far as is reasonably practicable to ensure that employees, customers and visitors are not at risks.
 - b. Ensure that staff has relevant health and safety, documentation, information and training required to make them aware of potential hazards in SOLAR energy production.
 - c. Communicate with the staff on matters on health and safety and the importance of reporting risks by encouraging them to bring to the attention of management any system emergency.

Employment, Solar Development And Installation >

All our technicians are trained in relevant aspects of SOLAR DEVELOPMENT and POWER INSTALLATION required by the company. This comes in THREE stages:-

1. Induction Training and Employment of NEW technicians

We recruit and train staff who end up working in our offices. The training and preparation of our trainees is done for effective SOLAR ENERGY service delivery. Adequate training and coaching is highly required in solar energy production. Solar development and power installation is fully explained in an INDUCTION classes for PRACTICAL knowledge. In addition, we demonstrate our trainings to the new recruits in order to keep up with INTERNATIONAL standards of Solar Energy industry. Ibrasom Green Solar Energy has both internship recruits working under supervision of the experienced solar energy technicians. Finally, we go with new trainees into the details of solar energy MANUALS that guide service delivery in system development and solar installation.

2. Training in Seminars and Workshops

Solar development and system installation is heavily supervised to ensure that all TECHNICIANS learn how to keep standards of solar energy. The company provides training through MANUALS that guide on system development and installation specifications.

3. Specific Training on Solar Development and Installation

This specialized training includes all aspects of SOLAR DEVELOPMENT and INSTALLATION. We recognize different SOLAR SYSTEM requirements in respect to clients' demand in the market.
